

BLUEMAX PAY

Stop figuring out payments separately.

Bluemax Pay is a native Odoo module that runs terminals, POS, invoices, online checkout, and payment links on one provider.

KEY DIFFERENTIATOR

One module. One provider. Every way your client gets paid. Most options cover one piece, like POS terminals or online checkout. Bluemax Pay covers POS terminals, online checkout, ACH, and payment links on Adyen, with every payment posting inside Odoo. That's our wedge, and yours.

How the Co-Sell Works

- 1 You spot a client who needs payment processing in Odoo.
- 2 You introduce us with a warm handoff (email or joint call).
- 3 We handle merchant onboarding, module setup, and terminal config.
- 4 Client goes live. You look like a hero. We handle payment support.

What's In It For You

- ✓ Earn a one-time referral fee for each introduced client who signs.
- ✓ Zero technical lift: we handle setup, support, and terminal provisioning.
- ✓ Stronger client relationships: you fix a payment headache they have today.
- ✓ Co-marketing: joint case studies and Odoo community visibility.

15-minute discovery call. No pitch. No commitment.

We do the heavy lifting so your client has a smooth go-live.

Serving US-based merchants | Odoo 16–19, Community & Enterprise | Powered by Adyen™
